TESTIMONIALS.

The Family Herald, 30th September 1870.

"A very slight acquaintance with Judson's Dyes will render their application clear to all."

The Mechanics' Magazine, April 1871.

"We think that a benefit has been conferred on the people by the introduction of these Dyes at a price which places them within the reach of all."

Cassell's Household Guide, page 300.

"The process being so clean and simple, there appears no reason why every lady should not be her own dyer, or why dyeing day should not, in every well-regulated family, be as common, and much more agreeable, than washing day. Any young lady can begin her experiment on a ribbon or feather, following the directions already given, in a basin of water, and proceed afterwards to larger articles of dress in a bread-pan or foot-bath. The thing would be worth trying from motives of economy; and much more real amusement would result from it than from many of the melancholy recreations to which young ladies of the present day are condemned."
